Overview

Emergency Medical Service Vehicle

This emergency medical service vehicle is engineered for reliable pre-hospital care and efficient patient transport. It features a versatile interior configuration suitable for various medical response needs, ranging from basic transport to advanced monitoring. Designed with durability and rapid response capabilities in mind, it includes essential life support equipment and medical-grade interior materials.

Technical Specifications

Dimensions

Parameter	Value
Overall Size (mm)	5070/5020 x 1690 x 2115/2405
Wheelbase (mm)	2590
Front/Rear Tread (mm)	1460/1450 (Front), 1440/1430 (Rear)
Front/Rear Suspension (mm)	1320/1160, 1320/1110

Performance Metrics

130 km/h

Max Speed

2800 kg

Total Weight

1720 kg

Curb Weight

Chassis & Handling

- Passenger Capacity: 5-9 people
- ABS: Yes
- Approach/Departure Angle: 14°/12°
- Axles: 2
- Steering: RHD/LHD
- Steel Spring: -/5, -/3
- Tyre Number: 4
- Tyre Type: 195/70R15, 185R14, 195/70R15C, 185R14C

Medical Equipment

Transport Configuration

- Portable folding stretcher
- Medicine cabinet
- Fixed oxygen bottle
- Transfusion hooks (2)
- Disinfection lamp
- Waste bucket
- Single seats (3)
- Long storage cabinet and seat
- Partition with aluminum alloy windows
- Blue alarm lamp set
- Interior lights (2)
- Inverter
- Socket set
- Portal handrails
- Back door pedal
- Medical wear-resistant plastic floor
- Ambulance cross signs

Monitor Configuration

- Polymer medical environmental materials
- Long row ambulance lights and protection
- Automatic stretcher
- Shovel type stretcher
- Folding stretcher
- Oxygen supply system (bottles/oxygen)
- Accompanying chair
- Sterilization lamp
- Inverter and battery
- External power supply system
- Interior lighting system
- Electronic ventilating fan
- Partition with observation window
- Entry pedal
- Front and rear intercom system
- Medical washed and wear-resistant flooring
- Waste bucket
- Body advertising and ambulance logo
