

Emergency Vehicle LED Lightbar

This LED lightbar is designed for emergency and security applications. It provides high visibility with multiple flash patterns and durable construction for reliable performance.

Overview

High-Visibility Emergency Lighting

The LTF7400C LED lightbar is a versatile lighting solution engineered for emergency and security applications. Featuring a dynamic combination of blue, white, and red LEDs, it delivers high visibility and effective signaling in critical situations. Its aerodynamic profile minimizes wind resistance for stable performance at high speeds, while the durable construction ensures reliability under harsh weather conditions.

Technical Specifications

Design & Build

- Aerodynamic profile for reduced wind resistance
- Weather-resistant construction
- Low power consumption
- Easy installation

LED Color Configuration	Blue, White, Red
Flash Patterns	Multiple customizable flash patterns
