

Emergency Vehicle LED Lightbar

This LED lightbar is designed for emergency vehicles, providing high-intensity warning signals. It features energy-efficient LED technology and multiple flash patterns for enhanced visibility.

Product Overview

High-Intensity Emergency Lighting

The LTF8858 LED lightbar is a high-intensity emergency vehicle lighting solution designed for superior visibility and safety. Featuring robust construction and energy-efficient LED technology, this lightbar provides a brilliant amber warning signal. It is equipped with multiple light modules for a wide-angle illumination pattern, making it ideal for emergency responders, construction vehicles, and other applications requiring high-visibility warning lights.

Technical Specifications
