

Emergency Vehicle LED Strobe Light Module

This LED module is designed for emergency vehicles, providing a compact and powerful strobe light. It features multi-color LEDs for versatile signaling in various emergency situations.

Overview

High-Visibility Emergency Signaling

The LTD626 LED module is a compact and powerful emergency vehicle strobe light engineered for maximum visibility in critical situations. Featuring multi-color LEDs, this module offers versatile signaling options suitable for a wide range of emergency and security vehicles. Its durable, low-profile housing ensures reliable performance and discreet mounting in demanding operational environments.
