

Emergency Vehicle Visor LED Light Bar

This visor light bar features linear high-power LEDs for strong brightness. It is designed for discreet vehicle mounting and offers multiple flash patterns.

Product Overview

High-Intensity Emergency Lighting

This high-intensity LED visor light bar is specifically engineered for emergency vehicle applications, offering a slim and discreet profile without compromising on illumination power. Built to withstand the rigors of demanding environments, it ensures maximum visibility for law enforcement, fire departments, and emergency medical services. The unit features customizable flash patterns to meet various signaling requirements.
