

Emery Cloth Roll for Metal and Woodworking

Emery cloth is designed for grinding, polishing, and finishing. It is used in metalworking, woodworking, and other surface preparation tasks.

Product Overview

Professional Abrasive Solution

This high-quality emery cloth roll is engineered for rigorous grinding, polishing, and surface finishing applications. Designed to meet diverse industrial needs, it provides consistent abrasive performance and exceptional durability across various materials. It is an essential tool for effective surface preparation in both metalworking and woodworking environments.

Key Features

Performance Benefits

- High abrasive efficiency
- Durable backing material
- Versatile grit size options
- Consistent finishing results

Primary Applications

Metalworking, Woodworking, Surface Preparation, Grinding, Polishing, Finishing

Product Specifications

Customization Options

Multiple Grit Sizes • Various Backing Materials

Product Type

Emery Cloth Roll
