

# EMT Conduit Compression Connector

This zinc die-cast compression connector is designed for use with EMT conduit. It provides a reliable connection between EMT conduit and electrical boxes or enclosures.

## ADDITIONAL IMAGES

## Product Overview

### Professional EMT Compression Connector

This high-quality compression connector is specifically designed to securely bond Electrical Metallic Tubing (EMT) conduit to electrical junction boxes and enclosures. Engineered for reliability, it features a durable zinc die-cast and steel construction that provides excellent corrosion resistance and mechanical protection. Its compression design ensures a smooth, secure connection without the need for complex threading, making it an ideal solution for dry location electrical installations.

## Technical Specifications

### Suitable Environments

Dry Locations

### Key Features

- Corrosion resistant construction
- Smooth inner layer for easy cable pulling
- Flexible screw design
- Secure mechanical connection

### Material Composition

Zinc Die Cast, Steel

### Color/Finish

White

## Certifications & Compliance

### Certifications

UL Listed, CSA Certified
