

EN877 Cast Iron Drainage Pipe

This EN877 cast iron pipe is designed for drainage, waste, and vent applications. It is manufactured to meet EN877 standards and features a smooth inner surface for optimal flow and corrosion resistance.

Product Overview

EN877 Cast Iron Drainage Pipe

This cast iron piping system is engineered specifically for drainage, waste, and vent (DWV) applications, adhering strictly to EN877 standards. The design features a smooth inner surface that promotes optimal flow and enhances corrosion resistance, making it a robust choice for long-term infrastructure projects. It is suitable for both above and below-ground installations, offering exceptional sound dampening and fire resistance properties.

Technical Standards

Standard	EN877
Applications	Drainage, Waste, Vent (DWV), Above Ground, Below Ground

Performance Features

Performance Benefits

- High corrosion resistance
- Smooth inner surface for optimal flow
- Excellent sound dampening
- Superior fire resistance
