

EN877 Standard Cast Iron Drainage Pipe

Cast iron pipes manufactured to EN877 standards for wastewater drainage. The pipes have a reddish-brown exterior coating and a yellow interior coating.

Product Overview

EN877 Standard Cast Iron Drainage Pipe

This high-quality drainage pipe is manufactured in strict accordance with the EN877 standard, specifically designed for wastewater and drainage systems. Featuring a durable cast iron construction, the pipes are treated with a corrosion-resistant reddish-brown exterior coating and a protective yellow internal coating to ensure longevity and optimal flow performance. These pipes offer a robust solution for professional plumbing and infrastructure projects requiring reliable, standardized drainage components.

Technical Standards

Compliance Standard	EN877
Material	Cast Iron
Primary Application	Wastewater Systems, Drainage, Infrastructure

Surface Treatment

Exterior Coating	Reddish-brown corrosion-resistant coating
Internal Coating	Yellow protective coating
