

Enclosed Diesel Power Generator

This enclosed diesel generator is designed for reliable power generation. It features a robust enclosure for noise reduction and weather protection, making it suitable for various backup power applications.

Overview

Reliable Power Generation Solution

This enclosed diesel generator is engineered to provide consistent and dependable power for a variety of demanding environments. Its robust enclosure design significantly reduces operational noise while offering superior weather protection, making it suitable for both industrial and commercial backup applications. Equipped with an intuitive control panel, the unit ensures straightforward monitoring and operation for reliable performance when you need it most.

Technical Specifications

Power Output

34 kW

Rated Power

Model Identifier

GFS-34KW

Features

Key Features

- Robust enclosure design
- Noise reduction technology
- Weather-resistant construction
- Integrated monitoring control panel

Applications

Suitable Applications

Industrial, Commercial, Residential Backup
