

Enclosed Three-Wheel Motorcycle

This is an enclosed three-wheel motorcycle designed for urban transport. It is suitable as a small taxi or delivery vehicle.

Overview

Urban Mobility Solution

This enclosed three-wheel motorcycle offers a versatile and compact solution for urban transportation needs. Designed with a full enclosure, windshield, and side mirrors, it provides protection from the elements while maintaining the maneuverability of a three-wheeled vehicle. It is suitable for various applications, including passenger transport as a small taxi or efficient last-mile delivery services.
