

End Lamp Shade Mold

This mold is designed for manufacturing SMC (Sheet Molding Compound) end lamp shades. It consists of two halves, precision-engineered to create the desired shape and dimensions.

Product Overview

Precision SMC Lamp Shade Mold

This industrial-grade mold is expertly engineered for the manufacturing of SMC (Sheet Molding Compound) end lamp shades. It features a robust two-part construction designed to withstand the high pressures and temperatures inherent in professional molding processes. Equipped with advanced heating and cooling systems, it ensures uniform curing and high-quality material flow for consistent production.

Technical Specifications

Key Design Features

- Precision-engineered two-part mold
- Internal heating and cooling channels
- Guide pins for precise alignment
- High-pressure and temperature resistance

Compatible Material	Sheet Molding Compound (SMC)
Operational Mechanism	Hydraulic System Ready, Pneumatic System Ready
