

End Mill Re-Sharpener

This portable grinder efficiently re-sharpens 2, 3, and 4-blade end mills. It features an easy-to-operate design and a special chuck set that requires no slotting knob adjustment for short-edge milling and grinding.

Product Overview

Professional End Mill Re-Sharpener

The TX-X1 is a versatile and portable grinding solution designed for efficient maintenance of cutting tools. It is engineered for ease of use, allowing operators to achieve precision results without requiring advanced technical training. The system is specifically optimized for sharpening 2, 3, and 4-flute end mills while offering custom configuration options for specialized blade work.

Technical Capabilities

Available Customizations

- Tungsten rod support for end blade opening

Supported Flute Counts

2 Blades, 3 Blades, 4 Blades
