Product Overview

Professional Lifting Solutions

This endless loop round sling is engineered for heavy-duty lifting applications in construction and industrial environments. Featuring a flexible synthetic fiber construction, it protects loads from damage while ensuring even weight distribution through its endless loop design. The sling is built for longevity with a protective outer sleeve and is certified for safety and reliability.

Certifications & Standards

Quality & Safety Standards

CE, TUV Rheinland, GS Certified

Technical Specifications

Design Features

- Endless loop configuration
- Protective sleeve for increased durability
- Color-coded capacity identification
- Flexible structure for load protection

Material

Synthetic fiber (Polyester)

Usage Information

Ideal Applications

Construction • Rigging • Manufacturing • Heavy-duty industrial lifting
