

Endless Webbing Sling

This webbing sling is made from high-quality synthetic fiber using advanced weaving technology and equipment. It can be produced with safety factors of 4:1, 5:1, 6:1, 7:1, and 8:1 according to customer requirements.

Product Overview

Versatile Endless Webbing Sling

This endless webbing sling is engineered from high-strength synthetic fibers to ensure reliable performance during heavy lifting operations. The continuous loop design allows for multiple rigging configurations and promotes even load distribution across the sling. Its durable construction offers excellent resistance to abrasion and mechanical damage, making it a dependable solution for demanding industrial and construction environments.

Type	Endless Webbing Sling
------	-----------------------

Key Features

Material Characteristics	High-strength synthetic fiber, Abrasion resistant, Continuous loop
--------------------------	--

Application

Suitable Applications

- Industrial lifting
- Construction rigging
- Heavy load handling
