

Energy-Efficient Compact Fluorescent Light Bulb

This energy-efficient compact fluorescent light bulb is designed for general illumination. It features a folded tube design for a compact size and a standard base for easy replacement of incandescent bulbs.

Product Overview

Energy-Efficient Illumination

This compact fluorescent light bulb is engineered for high-efficiency general illumination in both residential and commercial environments. Its specialized folded tube design allows for a significantly smaller footprint compared to traditional lighting solutions while maintaining excellent light output. The bulb is designed with a standard base, ensuring seamless replacement for existing incandescent fixtures and immediate energy savings.
