

Energy Efficient Induction Cooktop with Timer

This induction cooktop features wide frequency energy saving technology and 80V ultra-low voltage startup. It offers a wide voltage range and a 0-23 hour timer with a digital display.

Overview

High-Efficiency Induction Cooking

This advanced induction cooktop is engineered for versatility and energy efficiency in demanding environments. Featuring ultra-low voltage startup technology, it operates reliably across a wide voltage range of 80V-280V. With precise five-stage temperature control and a robust 300°C stir-fry function, it provides professional-grade performance for various culinary applications.

Performance & Technology

Temperature Control

30 °C Min Temp	300 °C Max Temp
--------------------------	---------------------------

Operating Voltage	80V - 280V
Minimum Startup Voltage	80 V
Firepower Control	5-stage control

Features

Cooking Functions

- Stir-fry
- Barbecue
- Hot milk
- Boiling water
- Cooking rice
- Soup/Porridge
- Hot pot

Timer & Scheduling	0-23 hours with digital display
--------------------	---------------------------------

Design & Build

Exterior Finish	Titanium car paint
-----------------	--------------------

Certifications

Compliance	Energy Saving Certified
------------	-------------------------
