Overview

High-Performance T-Series LED Lighting

This high-efficiency LED bulb series is engineered for general illumination, offering a robust and durable solution for various commercial and residential applications. Designed for optimal thermal management, these bulbs ensure consistent, bright, and uniform light output while significantly reducing energy consumption compared to traditional incandescent or fluorescent alternatives. With a standard screw base, they provide a seamless, energy-saving upgrade for existing lighting fixtures.

Technical Specifications

Available Power Ratings

18 W T80	28 W T100	38 W T115	48 W T125
--------------------	---------------------	---------------------	---------------------

Socket Compatibility

E26, E27

Features

Environmental Compliance

Mercury-Free • No UV Emissions • Energy Efficient

Key Benefits

- Robust construction for extended lifespan
- Optimal thermal management system
- Uniform light distribution
- Direct replacement for traditional bulbs
