

Energy Efficient LED Bulb

This energy-efficient LED bulb is designed for general lighting applications. It features a standard screw base for easy installation and provides bright, uniform illumination with low power consumption.

Product Overview

Energy-Efficient Lighting Solution

This energy-efficient LED bulb is designed for versatile general lighting applications in both residential and commercial settings. It features a standard screw base, ensuring easy installation across a wide variety of fixtures. By providing bright and uniform illumination while maintaining low power consumption, it offers a cost-effective lighting solution. Its extended lifespan significantly reduces the frequency of replacements, making it a reliable choice for professional environments.

Technical Specifications

Luminous Flux

800 lm

Luminous Flux

Power Consumption

9 W

Features

Ideal Applications

Residential, Commercial, General Lighting

Base Type

Standard Screw Base
