

Energy Efficient LED Light Bulb

This LED light bulb provides efficient lighting. It features a cylindrical diffuser atop a finned heat sink and a standard screw base.

Product Overview

High-Efficiency LED Lighting Solution

This advanced LED light bulb utilizes high-quality SMD LED technology to provide superior illumination while maintaining excellent energy efficiency. Designed for professional environments, it offers instant-start, flicker-free light that is gentle on the eyes and free from UV or IR radiation. With a lifespan exceeding 80,000 hours, this bulb significantly reduces maintenance costs and energy consumption compared to traditional lighting solutions.

Technical Specifications

Light Source	High quality Epistar SMD LED
Power Factor	0.95
CRI	80

Energy Saving

Features & Compliance

Key Operational Benefits

- Instant start
- Gentle light, no shadow, no flickering
- Eye-protective
- High light efficiency
- Easy installation

Environmental Compliance

Mercury Free, No UV Radiation, No IR Radiation, EMI Free
