Product Overview

High-Efficiency Intelligent Water Pump

This intelligent water pump is engineered for superior reliability and energy efficiency in both residential and commercial applications. Featuring an advanced motor with class F heat resistance and reinforced structural components, it delivers stable, high-performance operation. Built with premium materials like brass impellers and corrosion-resistant castings, it is designed for long-term durability and leak-proof performance.

Certifications & Standards

Certifications

CE, CSA (C US), ISO 9001, RoHS

Motor & Electrical Specifications

Key Motor Metrics

155 °C

Max Heat Resistance

35 %

Mechanical Seal Life Extension

Construction & Materials

Component Materials

- Brass Impeller
- Reinforced Nylon Fan Cover
- Welded Stainless Steel Rotor Shaft
- Class F Copper Wiring

Performance Data

Model Specifications

Model	Power (kW)	Max Suction (m)	Max Flow (l/min)
TGP(B)100(l)	0.18	8	25
TGP(B)125(l)	0.37	8	35
TGP(B)550(l)	0.55	8	50
TGP(B)750(l)	0.75	8	50
