Product Overview

High-Performance Engine Bearing

This precision-engineered engine bearing is designed to ensure optimal performance and durability for automotive engines, specifically compatible with Toyota Hiace, Pick Up, and Forklift 4Y engines. Manufactured to OEM standards, these components provide superior resistance to wear and tear, effectively reducing friction for enhanced engine efficiency. With readily available stock, these bearings are ready for rapid dispatch to support your maintenance and repair needs.

Compatibility & Application

Engine Compatibility	Toyota 4Y, Toyota Hiace, Toyota Pick Up, Toyota Forklift
