

Engine Component Set for Diesel Engines

Comprehensive set of engine components designed for diesel engines. These parts ensure optimal performance and durability for engine rebuilds, repairs, and maintenance.

Overview

Comprehensive Diesel Engine Component Set

This comprehensive set of engine components is designed to support the rebuild, repair, and maintenance of diesel engines. Each component is engineered to meet or exceed OEM specifications, ensuring optimal performance, durability, and reliability under demanding operating conditions. The collection includes critical rotating and stationary parts necessary for restoring engine efficiency and extending service life.

Key Components

Included Components

- Cylinder Head
- Cylinder Block
- Crankshaft
- Piston and Piston Rings
- Cylinder Liner
- Turbocharger
- Bearing
- Connecting Rod
- Camshaft
- Fuel Pump
- Injector
- ECM/ECU

Technical Details

Manufacturing Origin	China
Part Identification Markers	4929520-08, C3965
