Product Overview

High-Performance Cooling System Solution

This premium engine coolant hose is engineered for superior heat and pressure resistance in automotive cooling systems. Designed to meet strict industry standards, it ensures reliable circulation between the engine, radiator, and heater core. The durable reinforced rubber construction provides a precise fit, effectively preventing leaks and supporting optimal engine temperature management.

Technical Specifications

Material	Reinforced Rubber
Quality Standards	IATF 16949

Compatibility

Supported Car Series

- Japanese (Honda, Toyota, Nissan, Mazda, Mitsubishi, Isuzu, Subaru, Suzuki)
- European (Audi, Skoda, Benz, BMW, Peugeot, Fiat, Volkswagen, Renault, Opel, Volvo, Citroen)
- American (Ford, Buick, Chrysler, Jeep, Chevrolet, GM, Dodge)
- Korean (Kia, Hyundai, Daewoo)

Service & Capability

Service Options

OEM • ODM • Customized Packing • Custom Production

Available Models	3000 types
