Product Overview

Engine Coolant Reservoir Tank

This engine coolant reservoir tank is designed to efficiently hold excess coolant from your vehicle's cooling system, ensuring optimal engine temperature regulation. Engineered for durability and reliability, it is constructed from high-quality materials to prevent leaks and overheating. This component is specifically designed to fit the Buick Lacrosse 2.4, providing a seamless replacement solution for maintaining your engine's performance.

Technical Details

Material	PA66 GF33 (Polyamide 66 with 33% Glass Fiber)
Cavity	CAV1

Compatibility

Compatible Vehicle	Buick Lacrosse 2.4
--------------------	--------------------

Quality & Standards

Industry Applications

- Automotive
- Aviation
- Motorcycle
- Household Appliances
- Daily Consumer Goods

Certifications	TS16949
----------------	---------
