

Engine Cooling Radiator

This high-performance radiator is designed for efficient engine cooling. It features a durable core and robust construction for reliable operation.

Product Overview

High-Efficiency Cooling Performance

This engine cooling radiator is engineered for durability and reliable heat dissipation under demanding conditions. Designed for optimal temperature regulation, it prevents overheating and helps maintain consistent engine performance over a long service life. Its robust construction ensures high resistance to temperature and pressure, making it a dependable choice for critical tractor engine applications.

Technical Specifications

Part Number	2485B280
Core Dimensions	518 x 517 x 36 mm
Compatible Engine Series	1103C-33, 1103C-33T, 1103D-33, 1104A-44, 1104C-44

Performance Features

Performance Highlights

- High temperature resistance
- High pressure resistance
- Extended service life
- Efficient heat dissipation

Logistics & Quality

Packaging Standards

WMM Carton • Oil Resistant • Water Resistant
