Product Overview

High-Performance Engine Cooling Solutions

This professional-grade engine cooling water pump is engineered for superior coolant flow and precise engine temperature regulation. Built with durable cast iron, the unit ensures long-lasting reliability for heavy trucks, tractors, and automobiles. It is a trusted aftermarket component designed to meet the rigorous demands of global automotive service standards.

Technical Specifications

Included Components

- Water pump unit
- Composite gasket
- Pulley mounting hub

Construction Material

Cast Iron

Identification Markings

OKC3, 41816201

Application Compatibility

Compatible Vehicle Types

Heavy Trucks, Tractors, Passenger Cars

Regional Applications

American, Japanese, Korean
