Product Overview

High-Performance 4Y Cylinder Head

This premium engine cylinder head is designed specifically for the 4Y engine platform, ensuring precise fitment and reliable performance. It features a robust construction engineered for optimal combustion efficiency and thermal management. With integrated valve spring seats and rocker arm assembly mounts, this component is ready to support high-duty engine operations in demanding environments.

Technical Specifications

Key Design Features

- Integrated valve spring seats
- Rocker arm assembly mounts
- Engineered intake and exhaust ports
- Precision-machined threaded mounting points
