Overview

High-Performance Engine Cylinder Liner

This precision-engineered cylinder liner is designed to ensure optimal engine performance and long-term durability. Featuring a 101.00mm bore and robust cast iron and steel construction, it provides a reliable solution for maintaining engine efficiency. With advanced surface treatments and excellent cooling properties, this component is built to withstand rigorous operating conditions while reducing internal wear.

Technical Specifications

Bore Diameter	101 mm
Total Length	200 mm
Material	Cast iron, Steel
Hardness	HB210-280
Engine Code	B3904166

Performance & Features

Key Features

Good sealing • Good cooling effect • Wear-resistant

Surface Treatments

- Phosphating
- Platform
- Vulcanization
- Nitriding

Logistics & Warranty

Supply Ability

5000 pieces

Monthly Capacity

Warranty	12 months
Condition	New
