

Engine Cylinder Liner for 1SZ/2Z Series

Cylinder liner designed for Isuzu engines, specifically the 1SZ/2Z series. It has a 110.00mm outer diameter and ensures optimal engine performance and longevity.

Product Overview

Engine Cylinder Liner Overview

This precision-engineered cylinder liner is designed to deliver optimal engine performance and longevity. Manufactured from high-quality cast iron and steel, it features advanced surface treatments including phosphating and nitriding to ensure superior wear resistance and heat dissipation. Perfectly suited for engine rebuilds and maintenance, this component provides reliable sealing and efficient cooling for demanding operational environments.

Condition

New

Engine Compatibility

Isuzu 6HE1, 1SZ Series, 2Z Series

Technical Specifications

Material

- Cast iron
- Steel

Surface Treatments

- Phosphating
- Platform
- Vulcanization
- Nitriding

Bore Diameter

110 mm

Total Length

210 mm

Hardness

HB210-280

Performance & Logistics

Supply Capacity

5000 pieces

Monthly Supply

Key Features

Good sealing, Good cooling effect, Wear-resistant

Warranty

12 months
