Product Overview

Engine Component Set

This comprehensive engine parts set includes high-precision cylinder liners, pistons, connecting rods, and piston rings designed for demanding marine diesel engine environments. Engineered for durability and reliability, these components ensure optimal combustion efficiency and structural integrity under extreme operating conditions. The set is compatible with a wide range of heavy-duty engine models, providing a complete solution for maintenance and performance upgrades.

Compatibility

| | |
|----------------------|-----------------------------|
| Engine Compatibility | 4BT, 6BT, 6CT, NT855, KTA19 |
| Primary Application | Marine diesel engine |
