

Engine Fuel Injection Plunger

This plunger is designed for fuel injection systems in engines. It ensures reliable and efficient operation within the engine system.

Overview

Precision Engine Component

This engine fuel injection plunger is a precision-engineered component designed for optimal performance in automobile engine applications. Manufactured to meet stringent quality standards, this part ensures reliable and efficient operation within the fuel system. It is an essential component for maintaining consistent engine performance, longevity, and overall system reliability.

Compatibility & Identification

Compatible Part Numbers	7N1183, 7W0182, 9H5797, 4P9830, 1082104
Component Type	Fuel Injection Plunger
