Overview

Engine Liner Kit Performance

This comprehensive engine liner kit is engineered to deliver optimal performance and durability for automotive engine applications. Each component, including pistons, rings, and liners, is precision-manufactured to meet or exceed OEM standards, ensuring a reliable solution for engine overhauls. By utilizing advanced materials like high-quality nickel alloy and manganese steel, this kit provides extended service life and consistent operation.

Material Composition

Piston Material	China Standard 109 cast aluminum (Japan AC8A quality standard)
AIFIN Material	High-quality nickel alloy
Clip Material	No.65 manganese steel

Technical Features

Pin Processing	Cold extrusion with visible annular end surface
-----------------------	---

Kit Contents

Components Included	Cylinder Liners, Pistons, Piston Rings, Piston Pins, Retaining Rings, Connecting Rod Bearings
----------------------------	---
