Product Overview

High-Performance Engine Protection

This oil filter is engineered to provide superior engine protection by effectively removing contaminants and impurities from engine oil. Designed to meet or exceed OEM standards, it ensures consistent lubrication and helps extend the operational lifespan of your engine. Its robust construction is built to withstand demanding pressure and temperature conditions, making it a reliable choice for various automotive applications.

Technical Details

Key Features

- High-efficiency filtration media
- Durable housing for high-pressure resistance
- Designed for optimal oil flow
- Engineered for high-temperature stability

Manufacturing Origin

Made in China

OEM Reference

MD014833

Compatible Series

mitsubishi
