

Engine Piston and Cylinder Assembly, 56.5mm Bore

Piston and cylinder assembly designed for high-performance engines with a 56.5mm bore. The assembly features an aluminum cylinder with a steel sleeve, and an aluminum piston with rings.

Product Overview

High-Performance Engine Assembly

This premium engine piston and cylinder assembly is engineered for demanding high-performance applications. Featuring a 56.5mm bore size, the kit provides a comprehensive solution including a precision-engineered aluminum cylinder with a durable steel sleeve, a domed aluminum piston, and a complete set of rings, wrist pin, and circlips. Designed to optimize combustion chamber sealing and cooling efficiency, this assembly ensures consistent power delivery and mechanical longevity.

Technical Specifications

Included Components

- Cylinder with cooling fins
- Domed piston
- Piston rings
- Wrist pin
- Circlips

Key Features

High-performance design • Integrated cooling fins • Steel-sleeved cylinder • Precision sealing

Bore Size

56.5 mm

Materials

Aluminum Cylinder, Steel Sleeve, Aluminum Piston, Steel Rings, Steel Wrist Pin
