

Engine Starter Motor

This high-performance starter motor is designed for reliable engine starting. It features durable construction and a solenoid actuator for efficient engagement, ensuring quick starts.

Product Overview

Reliable Engine Starting Performance

This high-performance starting motor, model 2V80, is engineered to provide robust and dependable engine ignition across a wide range of industrial and automotive applications. Its durable construction is paired with a precision solenoid actuator, ensuring efficient engagement and optimal torque during every start. Designed for professionals who require quick and consistent results, this unit offers a dependable solution for demanding mechanical environments.

Technical Details

Model Number	2V80
Component Type	Starting Motor
Key Features	High-performance, Robust Construction, Solenoid Actuator, Quick Engagement
