Product Overview

High-Performance Starting Solution

This starter motor is engineered for reliable engine ignition, offering high starting torque within a compact, space-saving design. It is specifically optimized for low-temperature environments, ensuring consistent performance when needed most. Designed for ease of maintenance, the unit is simple to remove and install, making it an ideal choice for professional applications.

Technical Specifications

Rated Power Output

0.8 kW

Minimum Output

1.4 kW

Maximum Output

Rated Voltage

12 V

Compatibility

Compatible Engine Models

- KM186
- KM178
- KM170
- KM290

Features

Core Advantages

High starting torque, Compact design, Easy maintenance, Cold start capable
