

Engine Timing Tool Set for BMW Mini PSA

1.4 1.6

This engine timing tool set is designed for BMW Mini and PSA 1.4 and 1.6 liter engines. It includes tools for locking the camshaft and crankshaft and setting the timing during engine maintenance.

Product Overview

Professional Engine Timing Solution

This comprehensive engine timing tool set is designed for precise maintenance on 1.4 and 1.6 Valvetronic direct injection petrol engines. The kit provides all essential components for locking camshafts and setting crankshaft timing, ensuring accurate alignment during repairs. Engineered for durability and professional use, this set is compatible with a wide range of popular vehicle models.
