

Engineering Application Pump

This pump offers corrosion and wear resistance with reliable performance. Its strong adaptability ensures minimal loss in various engineering applications.

Product Overview

Engineering Application Pump

The CYB25-225 TH oil well pump is an advanced solution engineered to meet modern market demands for enhanced efficiency and extended service life. This newly developed tube pump features exceptional corrosion resistance and wear durability, ensuring reliable performance in demanding environments. Its strong adaptability and minimal loss characteristics make it an ideal choice for complex engineering applications.

Technical Specifications

Model Number	CYB25-225 TH
Pump Type	Tube pump

Performance Features

Key Advantages	Corrosion resistant, Wear resistant, Reliable performance, High adaptability
----------------	--

Maintenance

Maintenance Profile	Optimized for extended pump overhaul periods and minimal loss
---------------------	---
