

Engineering Project Contracting

These services encompass large-scale engineering and international trade project execution. They provide project management services, including planning, engineering, investment and financing analysis.

Service Overview

Comprehensive Engineering Solutions

This service provides full-process engineering general contracting and international trade solutions. We specialize in turn-key projects and the delivery of complete equipment sets, handling everything from project planning and consulting to investment analysis and implementation. Our approach integrates sophisticated technology and professional project management to support large-scale industrial and infrastructure development globally.

Operational Capabilities

Core Competencies

Project Consulting, Engineering Design, Investment Analysis, Financing Analysis, Turn-key Contracting, Supply Chain Management

Geographic Reach

Operations across Asia, Africa, Europe, and the United States, covering over 30 countries and regions.

Service Scope

Supported Industry Sectors

- Power Engineering
- Metallurgical & Mining
- Petrochemical
- Transportation
- Marine Engineering
- Communications
- Environmental Engineering
- Agricultural Engineering
- Textile & Light Industry
- Building Materials
- Logistics
- Education & Health
