

Engraving and Etching Machine

This machine is used for engraving and etching various materials. It delivers detailed and accurate results.

Product Overview

Professional Power Control Module

This high-performance thyristor module is engineered for demanding power control applications. Featuring a robust Semipack 0 design, it offers reliable performance in motor control, power supplies, and welding equipment. The integrated baseplate ensures efficient heat dissipation, making it suitable for industrial environments requiring stability and durability.

Technical Specifications

Model Number	SKKT 15/12
Series Type	Semipack 0
Key Features	Power Control, Heat Dissipation Baseplate, Industrial Grade

Applications

Typical Applications

- Motor Control
- Power Supplies
- Welding Equipment
