

Engraving Machine

This engraving machine is designed for creating precise designs on various materials. It is suitable for producing personalized gifts, signage and decorative items.

Product Overview

Heavy-Duty Impact Tool

This heavy-duty sledge hammer is engineered for high-impact tasks, featuring a high-carbon steel head that ensures maximum durability and effective force transfer. Designed for professional use, it includes a reinforced fiberglass handle that provides both strength and vibration resistance. The non-slip grip enhances safety and comfort, making it an ideal choice for demanding demolition work, driving stakes, and breaking concrete.

Technical Specifications

Head Material	High-carbon steel
Handle Material	Reinforced fiberglass
Grip Type	Non-slip

Applications

Ideal Applications	Demolition, Driving stakes, Breaking concrete
