

Enterprise Data Storage System

This high-performance storage system is designed for enterprise environments. It supports various RAID levels and offers flexible connectivity options for reliable and efficient data management.

Product Overview

Enterprise-Grade Storage Solution

This high-performance data storage system is engineered for mission-critical enterprise environments. It provides advanced data protection mechanisms alongside high scalability to support the demanding needs of data centers and cloud infrastructures. The architecture ensures both reliable and efficient data management for business-essential applications.

Technical Capabilities

Ideal Applications

- Data centers
- Cloud storage
- Business-critical enterprise applications

RAID Support

RAID 0, RAID 1, RAID 5, RAID 6, RAID 10

Features

Key Advantages

High Scalability • Advanced Data Protection • Flexible Connectivity
