

EPDM Rubber Radiator Hose

This radiator hose is made of EPDM rubber. It is constructed with either EPDM/POLY-
ESTER/EPDM or EPDM/ ARAMID/EPDM for reinforcement.

Product Overview

High-Performance EPDM Radiator Hose

This EPDM rubber radiator hose is engineered for demanding automotive and industrial fluid transfer environments. Constructed with high-strength synthetic reinforcement, it offers superior resistance to environmental hazards including ozone, salt, road debris, and oil. The robust design ensures reliable performance across a wide temperature range, making it an ideal solution for critical cooling systems.

Technical Specifications

Temperature Range

-40

Minimum Temperature

125

Maximum Temperature

Material Resistance

- Oil
- Mud
- Salt
- Road Debris
- Ozone
- Coolants

Construction

EPDM/Polyester/EPDM, EPDM/Aramid/EPDM, Knitted Reinforcement

Identification

Part Number

4312605UF20
