

Ergonomic Pruning Shear for Garden Use

This pruning shear is designed for efficient and precise cutting of branches and stems. Its durable blade ensures long-lasting performance, while the ergonomic handles provide comfortable use during gardening and landscaping tasks.

Product Overview

Professional Pruning Performance

These ergonomic pruning shears are engineered for precision and efficiency in gardening and landscaping tasks. Designed for professional use, they feature a high-durability blade that ensures clean cuts on branches and stems. The handle ergonomics reduce hand fatigue during extended operation, making this an ideal tool for demanding horticultural projects.

Technical Specifications

Total Length	205 mm
Size	8 inch
Suitable Applications	Gardening, Landscaping, Pruning, Stem Cutting
