Product Overview

Professional Ergonomic Pruning Solution

This ergonomic pruning shear is engineered for efficiency and safety in professional gardening and landscaping applications. Featuring a high-performance spring-loaded mechanism, it significantly reduces manual effort during repeated shearing tasks. With its combination of sharp blade technology and a secure locking system, it ensures both precision for delicate pruning and safety during storage.

Technical Specifications

Core Features

- Spring-loaded mechanism for reduced effort
- Safety locking mechanism
- Ergonomic handle design

Blade Material

High-carbon steel, Stainless steel

Performance

Usage Highlights

1 Included

Safety Lock

1 Yes

Spring Assisted

Application

Ideal Environments

Gardens • Nurseries • Landscaping
