

Ergonomic Vertical Optical Mouse

This ergonomic vertical optical mouse is designed to reduce wrist strain and improve comfort. It features a high-precision optical sensor and adjustable DPI settings for customized sensitivity.

Product Overview

Ergonomic Design for Professional Use

This ergonomic vertical optical mouse is specifically engineered to reduce wrist strain and enhance comfort during extended periods of use. Its unique vertical orientation promotes a more neutral wrist posture, which helps minimize the risk of carpal tunnel syndrome. Designed with a contoured shape that fits the natural curve of the hand, it offers a seamless and comfortable user experience.

Technical Specifications

Sensor Technology	High-precision optical sensor
