

Escalator Drive Unit

This is an escalator drive unit. It features a robust gearbox, efficient motor, and integrated control system.

Product Overview

High-Performance Escalator Drive

This escalator drive unit is engineered for smooth, reliable operation in demanding environments. It features a robust gearbox, an efficient motor, and an integrated control system designed to ensure passenger safety and comfort. Built for durability and low maintenance, this unit is suitable for a wide range of escalator applications.

Technical Features

Core Components

- Robust Gearbox
- Efficient Motor
- Integrated Control System

Design Benefits

Reliable Operation, Durability, Low Maintenance, Passenger Safety, Passenger Comfort
