

Espresso, Cappuccino, and Latte Coffee Maker

This espresso coffee maker is designed for home use and can make espresso, cappuccino, and latte. It features a high-pressure pump, milk frothing function and a stainless steel decoration plate.

Product Overview

Professional Coffee Experience at Home

This versatile espresso, cappuccino, and latte coffee maker combines a compact, slim-style design with powerful performance. Featuring a 15-bar high-pressure pump and a durable aluminum die-casting boiler, it ensures optimal extraction for your favorite coffee drinks. With integrated milk frothing capabilities, a cup warmer, and easy-to-clean removable components, this machine is designed to bring café-quality beverages to your kitchen with convenience and reliability.
