

Espresso Machine with Milk Frother

This compact espresso machine features a high-pressure pump for optimal extraction and a stainless steel boiler for consistent temperature. It also includes a milk frother for creating cappuccinos and lattes.

Product Overview

Professional Espresso Experience

This compact espresso machine is designed for efficient and high-quality coffee extraction, perfect for office or small commercial settings. Featuring a high-pressure pump and a durable stainless steel boiler, it ensures consistent temperature and flavor for every cup. The integrated milk frother allows for the versatile preparation of cappuccinos and lattes, while the user-friendly design simplifies daily operation and maintenance.
